Please use this space to type your full proposal narrative for the SLCGP Subgrant Program.

It is not required to use all available pages; they are provided simply for your convenience in crafting a thorough proposal within the standardized PDF form format.

NOTE: Due to the nature of PDFs, entered text will not automatically overflow onto the next page. When one page is full, please manually continue to the next page.

When complete, please save this document with a clearly identifiable file name and submit along with your other project proposal materials.

You may delete these instructions when you begin to type.
